Encrypt

Uncheck unwanted
folder and Click on
"Save Choices"
button

By Doing that you are
making that folder
invisible. if you are
writing some notes and
save some URL it's
there. But its hidden in
dash board. You did not
delete them.

When you check that
folder again it all shows
in your dash board

What do you want to do with doc1_enc_dec.pdf?

In Chrome Browser it will automatically download in your "download folder" in your pc

Please Check your file open properly after decryption. If it shows following Error

Please redecrypt your file with correct File Key text and Formatting Style applied if any. Your input File Key might have been incorrect. To provide you best and transparent file security, We don't store your File Key and hence cannot give you error for incorrect entry. If your key is incorrect the file generated after decryption will be incorrect and your program will not recognize it. If needed save your File Key in rSecureNote.
